Brendan Clancy

IT Support | Help Desk | Cybersecurity Professional

Ann Arbor, MI | bclanc22@gmail.com

PROFESSIONAL SUMMARY

Operations Associate & IT Specialist with hands-on experience managing Microsoft 365, cloud infrastructure, endpoint devices, and enterprise security for a growing organization. Proven track record supporting end users, administering SharePoint and Teams, onboarding and offboarding staff, managing devices via Intune, and implementing security best practices including MFA, Conditional Access, and external sharing controls. Detail-oriented, process-focused, and trusted as a primary technical resource across operations and IT.

Earned a Bachelor of Science in Cybersecurity from Grand Valley State University. Google Cybersecurity Professional Certification.

PROFESSIONAL EXPERIENCE

Operations Associate / IT Specialist | Sano (formerly Retirement & Wealth Strategies) | February 2026 – Present

- Sole IT administrator for Microsoft 365, Entra ID, Intune, SharePoint Online and Teams, covering device provisioning and lifecycle, security policy enforcement, and user access management.
- Led the company-wide identity migration from @rwsgroup.org to @sano.org. Updated UPNs and primary SMTP addresses across the tenant, merged a secondary Microsoft 365 tenant, set up mail forwarding from the retired domains, and fixed post-migration identity issues in OneDrive, SharePoint and Office apps.
- Tightened SharePoint permissions and external sharing, including separate transfer sites for former employees and advisors to limit outside access to client data.
- Manage Exchange Online mailbox permissions (Send As, delegation, forwarding, shared and room mailboxes) with PowerShell, and standardized conference-room booking with room lists and approval workflows.
- Building a company-wide software and license register that tracks who has access to each app, along with costs and renewal terms, for platforms including Microsoft 365, RingCentral and NordLayer.
- Automated tracking and alerting with Power Automate and Microsoft Lists, and write SOPs and evaluate vendors for business teams.

IT Support Technician — Rockford Construction (Jan 2025 – February 2026)

- Provide Tier 1–2 help desk support for end users, resolving hardware, software, and access-related issues.
- Troubleshoot Windows OS issues, enterprise applications, and user account problems in Active Directory.
- Support onboarding and offboarding by provisioning user accounts, devices, and permissions.
- Configure and deploy laptops, desktops, mobile devices, and peripherals for employees.
- Led company-wide Windows 11 migration, upgrading enterprise endpoints with minimal downtime.
- Supported rollout of enhanced password and security policies to improve organizational security posture.

IT Intern — GT Technologies (Jun 2024 – Aug 2024)

- Managed user accounts and group permissions in Active Directory across multiple departments. - Migrated user systems using Laplink PC Mover, ensuring data integrity and minimal user disruption. - Installed and supported enterprise software including CrowdStrike and TeamViewer.
- Performed hardware upgrades, system imaging, and troubleshooting on laptops and desktops.
